

# Are your files safe & secure?

DATA SAFE provides remote backup solutions for a variety of businesses

## Remote Online Backup

Ensure your data is safe and secure regardless of your computers physical location.

## Multi Layered Data Encryption and Security

Your data is encrypted utilizing a digital certificate key before leaving your computer. We are HIPAA and SOX compliant.

## Multiple Revision Level Backups

Saved changes that you wish you hadn't? We maintain a remote backup volume that contains multiple revisions of your data.

## Automated Backup Scheduling

Select the data you want backed up, its priority and how often backups occur. We do the rest!

## Unlimited Backup Volume Capacity

No space limitations on our servers!

## Windows Integrated User-interface

Our system is integrated with Microsoft Windows operating systems. Simply right click and select files for backup.

## Overnight System Restores

Your system failed? A complete copy of your backup volume is available to get you back on your feet.

## Our Data Centers

Your fully encrypted data is housed on secure our state-of-the-art servers with reliable and fast 100 Mbps connections.

Try it today-back up your **QuickBooks®** data for free!

Starting at  
**\$25/mo.**  
for 25 GB data
