Generation Home Care System Partners With Gateway EDI

Electronic Claims Processing of Claim Forms Available Now

MOUNT PLEASANT, MICHIGAN — January 7, 2008 — Integrated Database Systems (IDS) has partnered with Gateway EDI to give home care agencies the ability to submit health claim forms electronically.

“Many of our customers use electronic version of the CMS1500 to bill state Medicaid programs for homecare services,” said Lance Ferden, President of IDS. “It gives our customers an easy way to get their claims submitted in a timely manner. We selected Gateway EDI because they met our high standards for customer service and also presented an affordable solution for our customers”.

Gateway EDI (www.gatewayedi.com) is one of the nation’s faster growing EDI providers processing over 15 million claims monthly to over 3,000 payers across the country. To begin processing claims through Gateway EDI, current Generations Homecare System users will need to contact Gateway to establish an account.

Founded in 2003, Integrated Database Systems, Inc. provides software that manages the day-to-day activities of private duty home care agencies; the software also seamlessly integrates with QuickBooks for billing and payroll. An industry-leading software solution, more than six hundred companies in the United States, Canada, and abroad use Generations Homecare System.
